TMPR	Ascend LX
TOPP	XJ900
Wilson	Juice
Wilson	Juice Carbon and ECHO
Your Pickleball Place	Sledgehammer, MAXOR Q and Ultra
XSPAK	PRO 1.0

The above list uses the sound level of a selected paddle as the reference level for acceptable sound level. The paddle sound level selected is the average sound level measured by testing 20 Paddletek Element paddles. Every paddle on the above list was measured to be “no louder than the average Element” sound level.

The paddle models shown above in Bold were measured to be at least 2 decibels quieter than the average Element. All tests were done using an Onix Fuse ball but different ball models have not been found to usually impact relative sound level measurements.
